PROFESSIONAL EXPERIENCE

Software Engineer

October 2022 – Present

Banco Ourinvest

Brazil

- Work as a software engineer using NextJS (ReactJS), NestJS (NodeJS), Serverless Framework, GraphQL, AWS, and Python.
- Contributed to the development of the Customer Portal, enabling individuals to perform currency exchange operations.
- Implemented the Backend for Frontend (BFF) design pattern to improve API consumption and client performance.

Software Engineer

July 2022 – October 2022

ACT Digital – Moderna (International Client)

Brazil

- Worked as a software engineer using Angular 13 and Node.JS on behalf of Moderna, an international client.
- Led migration efforts from AngularJS to Angular 13, modernizing legacy applications.
- Maintained existing systems and developed new RESTful APIs.

Front-End Consultant

May 2021 – July 2022

Opah IT – DOTZ

Brazil

- Worked as a front-end consultant assisting in the modernization of DOTZ's digital platform.
- Contributed to the implementation of a Design System based on Lit Element.
- Developed features using Angular 12 and Prismic Headless CMS.

Front-End Consultant

May 2019 – April 2021

Zup Innovation and Technology – Banco Safra & Itaú

Brazil

- Assisted in the digital transformation of two of Brazil's largest banks: Banco Safra and Itaú.
- At Banco Safra: contributed to the development of their first mobile app, SafraWallet (now AgZero), handling legal compliance features and leading the payroll credit (crédito consignado) module.
- At Itaú: participated in multiple channel squads, owning the Business Checking Account (Conta Corrente PJ) area, and delivering key regulatory features including Circular 3981.
- Drove the migration from AngularJS with Sass to Angular 8 using Itaú's Voxel Design System.

Software Engineer

February 2017 – May 2019

Map Innovation

Brazil

- Contributed to the development of **Aplicativo Giulia**, a multifaceted platform with social impact.
- Worked across the full stack: NodeJS on the back-end, Angular and Sass on the front-end, with SQL and NoSQL databases.
- Led a small team delivering production-ready software for the Manaus Industrial Hub (Polo Industrial de Manaus).
- Built a module enabling deaf individuals to request SAMU (emergency medical services) ambulances, promoting digital accessibility.
- Taught an introductory HTML, JavaScript, and CSS class to a group of deaf students.

PERSONAL PROJECTS

Eldorado Gaming | E-Sports Organization

November 2020 – December 2022

- Founded and managed an e-sports organization with a team including a lawyer, UI/UX designer, psychologist, coaches (CS), and an e-sports manager.
- Former competitive DOTA 2 player with regional and international tournament victories.
- Led a fundraising campaign with the community, raising BRL 15,000 to support Manaus during the COVID-19 crisis.

anticorona.io | Fact-Checking News Portal

January 2020 – March 2020

- Co-developed a platform to filter and display verified COVID-19 news amid the surge of misinformation in Brazil.
- Built using AngularJS with Sass (front-end) and NodeJS (back-end).

Pra Que Rumo | Amazonian Tourism Platform

April 2015 – January 2017

- Helped strengthen Amazonian tourism through partnerships across more than 8 Brazilian states.
- Worked as a full-stack developer using Codeigniter/PHP.

AWARDS & RECOGNITION

Startup Weekend Mobile Manaus – 1st Place

2015

- Won the competition after 54 hours of mentorship and development with GetDelivery, a startup founded during the event.

Jaraqui Graúdo – Startup of the Year

2015

- Won the “Startup of the Year” award with PraQueRumo, recognizing contributions to the Jaraqui Valley startup ecosystem in Manaus.
